ETERNAL  BEAUTY
FACIAL AESTHETICS

If you're seeking to improve and maintain the appearance of your skin, Eternal Beauty has the solution without the need for surgery or pain.

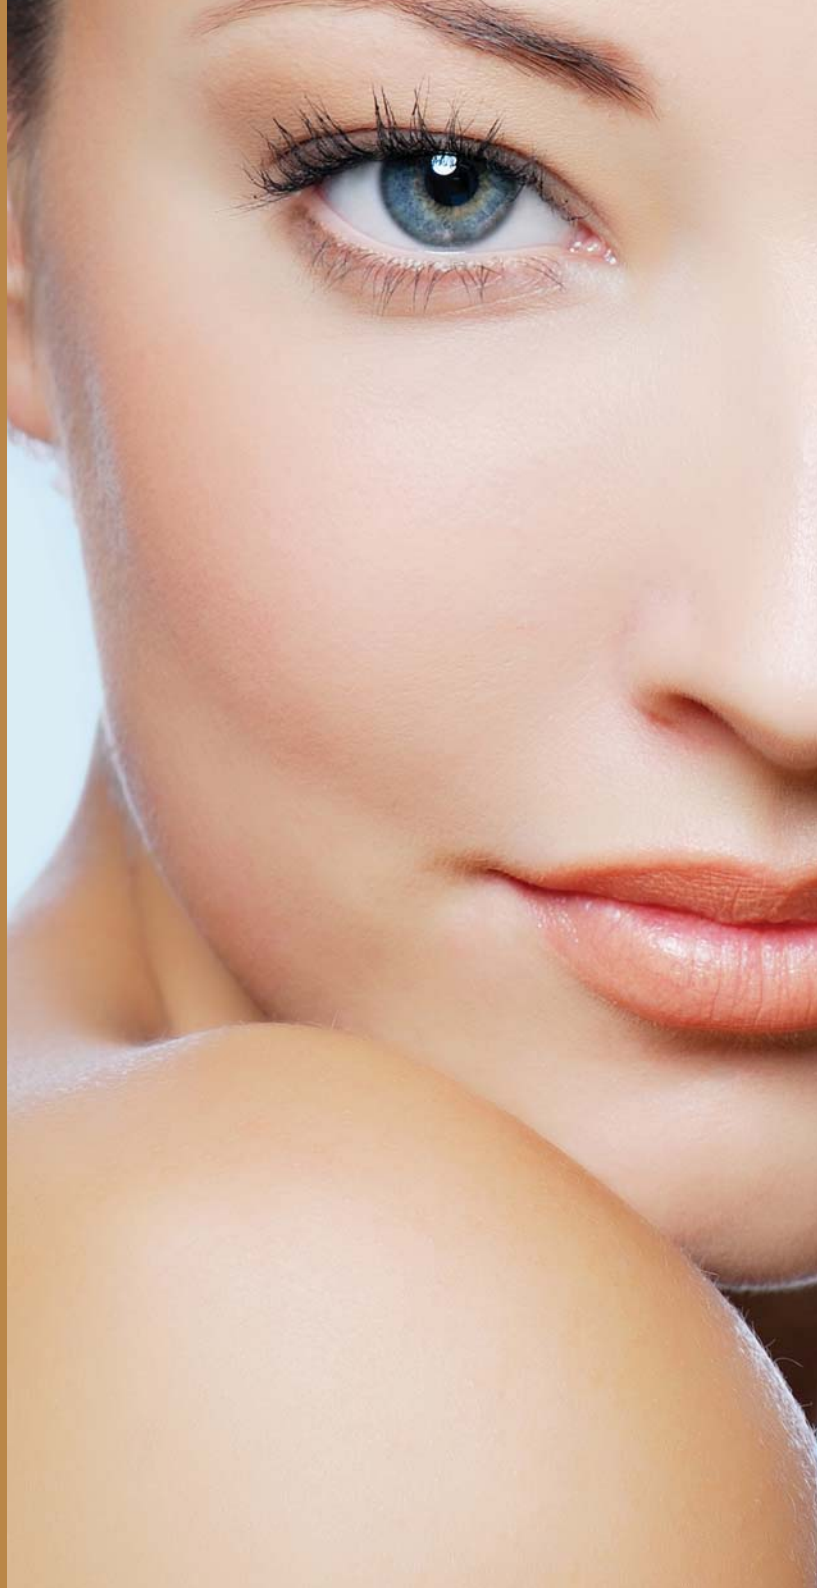

For over 5 years, Dr Susan Andrews, a member of the Association of Facial Aesthetics, has been committed to helping both male and female patients achieve a natural, youthful complexion using muscle relaxants and dermal fillers. The procedures are quick and simple, creating fabulous results.

Botulinum Toxin

Botox is probably the most popular cosmetic medical treatment for facial lines and wrinkles in the UK and it can be used successfully in combination with other rejuvenation treatments. Treatment is a simple, non-surgical procedure which smoothes persistent lines between your eyebrows, on your forehead and on your outer eye area. A treatment session consists of a few tiny needle prick injections, then, the **Botox** starts to relax the muscles which had caused the wrinkles to form.

Botulinum Toxin (more commonly know by the 'brand' **Botox**[®] produced by Allergan) is a simple; minimally invasive treatment and there is no recovery time needed. In fact, most people are able to return to work immediately after the treatment. The actual treatment only takes only a few minutes and the **Botox** takes effect in three to four days, while maximum results are achieved in 7-10 days. The muscle-relaxing benefits of the procedure can last up to an average 4-6 months. When the frown line starts to reappear, a simple repeat treatment is all that is necessary to maintain the desired result.

 **BOTOX**[®]

The **Juvéderm® ULTRA** range of injectable gels provides a simple, fast answer. It's an exciting new category of dermal fillers based on hyaluronic acid – a substance that occurs naturally in the body. This means it not only fills wrinkles but also replaces what the skin has lost over time.

Dermal fillers are injected to remove wrinkles and folds, to re-plump cheeks and to firm facial contours. They are great for nasolabial folds (from nose to mouth) and smoker's lines around the mouth.

Treatment takes between 30 minutes to one hour. The effects are immediate and you don't need to take any time off from work. There are many factors to consider when determining how long the effects will last however, **Juvéderm** has been approved to correct moderate to severe wrinkles and folds for up to one year.

 **Juvéderm™**
ULTRA

I would recommend it
to anyone, the results
are fantastic!
- Lynn
